ABSTRACT

This annual report presents national data on Catholic elementary and secondary schools. Enrollment patterns, regional geographic trends, types and locations of schools, student and staffing demographic characteristics, and student participation in selected education programs are analyzed, along with demographic trends in public and private education. Where data permit, the report compares information across the last decade, as well as with the past year. The demographic data report on the number of Catholic schools, their regional distribution, the location of the schools, and the types of schools. Information on school boards, single-gender schools, enrollment, tuition, and student characteristics are also given. The booklet likewise looks at staffing in Catholic schools and the special services offered to students, such as extended-day programs and Title I services. The findings show that total Catholic school student enrollment for the year under review was 2,648,859, which represents an increase of almost 3,400 students over the previous year. Minority student enrollment constituted 24.4 percent of total enrollment, and 13.6 percent of students were non-Catholic, whereas 92.2 percent of the full-time faculty were either lay men or lay women. Coeducational schools comprised 94 percent of the total. Three appendices offer summaries on schools and students, school locations, and supplemental data. (RJM)

PREFACE

The National Catholic Educational Association (NCEA) has been providing leadership and service to Catholic education since 1904. It is the largest private professional association in the world, representing more than 200,000 educators serving over 7.6 million students in preschools, elementary and secondary schools, parish catechetical and religious education programs, diocesan offices, colleges, universities and seminaries.

Located in our nation's capital, NCEA's mission is to advance the educational and catechetical mission of the church and provide leadership and service to its members. The association also articulates the contribution of Catholic education to the church and society and proclaims the uniqueness of Catholic schools.

Since 1970, the National Catholic Educational Association has published a statistical report on Catholic elementary and secondary schools in the United States. Prior to this time extensive data did not exist for these and other private schools. These data are needed to understand this significant sector of American education, to inform the public discussion of educational policy issues and to encourage and improve practice at the school level.

The first part of this report presents data concerning the context of American education in which private schools operate. This is followed by Catholic school enrollment and staffing demographic data that highlight school, student and staffing characteristics and special services provided to students in Catholic schools.

The report is based upon census data gathered by each of the 175 archdiocesan and diocesan offices of education in the United States. We are most grateful to these administrators and their staffs for their cooperation. While there is a diocesan response rate of 100%, the data do not include responses to all of the items by all of the dioceses or by all the schools within each diocese.

Thanks go to the members of the NCEA Data Bank Committee: Mr. Michael Guerra, Executive Director, Department of Secondary Schools; Ms. Regina Haney, Executive Director, National Association of Boards of Education; Dr. Robert Kealey, Executive Director, Department of Elementary Schools; Sr. Lourdes Sheehan, RSM, Executive Director, CACE Department and Ms. Barbara Keebler, Director of Public Relations for their suggestions and editorial assistance for this report. The committee wishes to offer our special thanks to Ms. Mary Jo Metzler for her outstanding service in collecting, organizing, auditing and editing the data which is the substance of this report, and to Mr. Wade Marshall for his considerable help in developing the reports.

Dale McDonald, PBVM, Ph.D.
Director of Public Policy and Educational Research

May, 1998

EXECUTIVE SUMMARY

This report presents national data on Catholic schools. Enrollment patterns, regional geographic trends, types and locations of schools, student and staffing demographic characteristics and student participation in selected education programs are analyzed along with demographic trends in public and private education. Where data permit, this report compares information across the last decade as well as with the past year.

For the sixth consecutive year, enrollment in Catholic schools nationwide has increased, rising by more than 81,000 students during the past five years. Waiting lists now exist in most suburban schools, and where scholarship support is available in inner-city schools, long waiting lists for lottery-like selection processes have resulted. In addition, more than 170 new schools have opened within the last decade, although the absolute number is down due to mergers, closings and consolidations.

The positive contribution which Catholic schools make to the education of America's children may be inferred from the statistical data presented and the growing number of non-Catholic families that entrust their children to Catholic schools. This is a testimony to the collaboration and commitment which the more than 152,000 teachers and more than 8,000 administrators, and 175 diocesan education office personnel have made to the youth and families served in Catholic education.

HIGHLIGHTS

Total Catholic school student enrollment for the current academic year is 2,648,859; elementary school: 1,995,649, middle school: 19,392; secondary school: 633,818.

- There is an increase of almost 3,400 students over last year and an over-all increase of 81,000 in the past five years.
- Minority student enrollment is 646,660 which is 24.4% of the total enrollment.
- Non-Catholic enrollment is 358,082 which is 13.6% of Catholic school enrollment.
- There are 8,223 Catholic schools; of these 6,897 are elementary, 107 are middle, and 1,219 are secondary.
- There are 3,351 schools (40%) which have a waiting list for admission.
- Coeducational schools comprise 94% of the total; single gender 6%.
- Full-time equivalent faculty number 152,260: laity 92.2%, religious/clergy 7.8%.
- 92.2% of full-time equivalent faculty are lay men (17.9%) and women (74.2%); the remainder consist of 6.2% sisters, 0.8% brothers and 0.8% priests.

THE CONTEXT OF AMERICAN PRIVATE EDUCATION

PUBLIC/PRIVATE SCHOOL COMPARISONS

Private schools, defined as those controlled by a non-governmental entity and financed from sources other than public taxation, have been an important component of American education since colonial days. The existence of private schools reflects the fundamental right of parents to exercise freedom of choice in selecting the education they deem most appropriate for their children. Parents select private schools based on several factors, among which are the religious, educational, cultural and social values that are espoused by the institution.

The National Center for Educational Statistics (NCES) survey of the private schools during the 1995-1996 school year indicates that there were 27,686 private elementary and secondary schools in the United States. Private schools account for 24.4% of all American schools. Private schools enroll approximately 5 million students, representing 10% of total elementary and secondary student enrollment in the United States.

NCES categorizes schools as Catholic, other religious and non-sectarian. Catholic schools are classified as a) parochial, b) diocesan, c) private. The category labeled other religious schools is comprised of three typologies: a) schools identified as conservative Christian, b) schools affiliated with a specific religious national denomination, c) schools not aligned with a national denomination. Non-sectarian private schools are a) regular, b) special emphasis, c) special education.

Schools which are classified as other religious constitute 47% of private schools, Catholic schools represent 30% and non-sectarian 23%. In contrast to the number of schools, there is a higher percentage of students in Catholic schools which enroll 50% of private school students while other religious schools enroll 35% and nonsectarian 15%.

MILLIONS

Source: National Center for Education Statistics: February 1998

SCHOOL AGE POPULATION PROJECTIONS

Total public and private school enrollment is projected to rise to 54.4 million by 2006, an increase of public school students to 48.3 million and private school students to 6.1 million. These trends indicate a need for new facilities, renovation and replacement of out-of-date buildings as well as the hiring of additional teachers.

CATHOLIC SCHOOL DEMOGRAPHICS: 1997-1998 ACADEMIC YEAR

SCHOOL CHARACTERISTICS

NUMBER OF SCHOOLS

In 1997-98, there were 8,223 Catholic schools in the United States; of these, 6,897 are elementary, 107 were middle and 1,219 were secondary.

REGIONAL DISTRIBUTION

The National Catholic Educational Association groups the nation into the following six geographical regions:

New England:	Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont
Mideast:	Delaware, District of Columbia, Maryland, New Jersey, New York, Pennsylvania
Great Lakes:	Illinois, Indiana, Michigan, Ohio, Wisconsin
Plains:	Iowa, Kansas, Minnesota, Missouri, Nebraska, North Dakota, South Dakota
Southeast:	Alabama, Arkansas, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee, Virginia, West Virginia
West/Far West:	Alaska, Arizona, California, Colorado, Hawaii, Idaho, Montana, Nevada, New Mexico, Oklahoma, Oregon, Texas, Utah, Washington, Wyoming

Exhibit 8 presents the number of schools by region and the percentages of the regional distribution. The Mideast and Great Lakes regions, at over 52.3 percent of the total number of Catholic schools, continue to have the largest percentage of schools with the rest of the nation maintaining stable enrollments. Middle schools, which reflect a relatively recent trend and focus in both public and private education, have been reported separately from elementary schools since 1995. Middle schools constitute only 1.3 percent of Catholic schools; the elementary school with a middle school program is the more frequent model.

*Middle schools reported as a separate group beginning in 1994-95; prior to this date they were included in the elementary school count.

NOTE: Percentages may not total 100% due to rounding.

LOCATION OF SCHOOLS

During the 1980s and early 1990s, the highest percentage of elementary and secondary schools was found in urban areas. At that time, NCEA reports included inner-city schools as part of the urban total; separate reporting of inner-city schools began in 1991. Exhibit 9 illustrates the continued increase in suburban school growth over the last decade. Geographic breakdowns by location are included as Appendix B.

EXHIBIT 9
Location of Schools

*107 Middle schools (predominantly urban) are included with elementary schools.

BEST COPY AVAILABLE

TYPES OF SCHOOLS

Catholic school typologies are determined by the source of their sponsorship. There are four classifications of Catholic schools: parish (sponsored by a single parish), inter-parish (sponsored by two or more parishes), diocesan (sponsored by the arch/diocese), and private (sponsored by a religious order or a private corporation). Exhibit 10 indicates that most elementary schools are parish schools; however, between 1987-88 and 1997-98, the growth in the number and percentage of elementary inter-parish schools continued. This growth underlines the reorganization of Catholic schools through consolidations.

In this section of the report, middle schools are included with the elementary; 50 of the 107 middle schools are inter-parish, the remainder primarily diocesan. Most secondary schools are either private or diocesan.

EXHIBIT 10
Types of Schools

* 107 Middle schools (50 interparish) are included with the elementary schools.

SCHOOL BOARDS/COMMISSIONS/COUNCILS

The 1997-98 collection of data from Catholic schools revealed that of 8,223 schools, 5,959 reported having an existing school board, commission or council. See Appendix C for a summary report by region and state.

EXHIBIT 11
Schools with Boards/Commissions/Councils

SINGLE GENDER SCHOOLS

The 1997-98 data indicate that 96% of all Catholic schools are coeducational. Reports on single gender schools indicate the following: 210 male and 286 female schools. See Appendix C for a summary report on part 1 of Exhibit 12 by region and state.

SCHOOL ENROLLMENT

ENROLLMENT BY GRADE LEVEL

Catholic school enrollment by grade level from preschool to grade 12 was consonant with actual and projected U.S. population trends indicated in Exhibits 4 and 5. In the 1997-1998 academic year, pre-school enrollments continued to increase, kindergarten decreased and other grade levels made modest gains or showed slight declines.

EXHIBIT 13

NOTE: Percentages may not total 100% due to rounding.

ENROLLMENT BY REGION

The total enrollment data, charted by region in Exhibit 14, indicates that although the Mideast and Great Lakes showed some decline, those regions continue to enroll over half (53.7%) of the students in Catholic schools. All other regions showed an increase in overall enrollment numbers, with the Southeast growing significantly.

Prior to 1991-92, statistics for total enrollment did not include Pre-kindergarten enrollment. Therefore, figures listed below for United States enrollment before 1991-92 will correspond to the total minus the PK figure in Exhibit 13; the post 1991-92 figures will correspond to the total with the PK figure included.

*Middle schools reported as a separate group beginning in 1994-95; prior to this date they were included in the elementary school count.

DIOCESSES WITH LARGEST ENROLLMENTS

The twenty largest dioceses serve over 46% of the total enrollment in Catholic elementary, middle and secondary schools, as illustrated in Exhibit 15. (Many dioceses are larger than the metropolitan area of their title.) Most of the enrollment in these 20 dioceses comes from the major city and the immediate suburbs of that area. The decreasing percentage and the position changes in this list reflect increased enrollment in areas with growing Catholic population centers.

STATES WITH HIGHEST SCHOOL ENROLLMENTS

As detailed in Exhibit 16, ten states account for nearly two-thirds of Catholic school enrollment. New York, California, Pennsylvania, Illinois and Ohio — the top five — had 45.3% of total enrollment. The decreasing percentage and the position changes in this list reflect increased enrollment in states where the Catholic population is growing.

EXHIBIT 16
Student Enrollment: States with Ten Highest Enrollments

State	1987-88	1996-97	1997-98

SCHOOLS WITH WAITING LISTS

The steady increase of enrollment numbers, combined with school closures and consolidations, has resulted in almost 40% of the schools having to place students on waiting lists for admissions.

EXHIBIT 17

TUITION

Tuition fees paid by families constitute a portion of the actual per pupil expenses. The average per pupil tuition in elementary schools is \$1,499, which is approximately 62% of actual costs per pupil. About 86% of elementary schools provide some form of tuition assistance. The secondary median freshman tuition is \$4,100, which is approximately 75% of actual costs. About 99% of secondary schools provide some form of tuition assistance. The difference between the per pupil cost and the tuition charged is obtained in many ways, primarily through direct subsidy from parish, diocesan or religious congregations resources and from multi-faceted development programs and fund-raising activities.

STUDENT CHARACTERISTICS

STUDENT ETHNICITY

Catholic schools, especially in urban areas, continue to serve increasing numbers of ethnic minority students. In 1970-71 minority enrollment was 10.8% of the total; ten years later it had increased to 19.4% and in 1997-98 it is 24.4%. The schools in the West/Far West region have the greatest number of minorities enrolled at all levels (52.7, 39.5 and 44.3%); the Plains had the fewest (8.5, 5.5 and 7.6%) reflecting a smaller minority population in that area.

ENROLLMENT OF NON-CATHOLICS

While most Catholic school students are Catholic, non-Catholic enrollment has risen from the 2.7% enrolled in 1970. Non-Catholic enrollment a decade later was 11.2% and today is 13.6%. The numbers and percentages are shown in Exhibits 20 and 21.

STAFFING OF CATHOLIC SCHOOLS

NUMBER OF TEACHERS

In 1997-98, the total, full-time equivalent (FTE) teaching staff in Catholic elementary, middle and secondary schools is 152,260.

1991 was the first year that both full-time and part-time staff (asked as FTE) totals were collected according to a weighted formula for different hours of part-time work. This year dioceses were asked to provide a full-time count and part-time counts, with each part-time position weighted as .333. Consequently, comparisons with previous year totals must be considered in light of these changes.

Per pupil ratios: The pupil/teacher ratio in Catholic schools in 1997-98 was approximately 17:1. By level they are: elementary schools 19:1, middle schools 15:1, secondary schools 14:1.

The lay faculty percentages continue to increase: 92.1% of teachers are lay whereas 7.9% are religious and clergy. Exhibit 22 shows the number of sisters, brothers, priests and lay teachers and Exhibit 23 shows their percentages. Because the staffing numbers were so small for the middle schools they are included with the elementary in Exhibit 23; however, in Exhibit 24 the middle school percentages are shown.

This year ethnic and religious data were collected from 172 of the 175 dioceses representing 98% of all teaching staff. Those data indicate that nearly 87.9% of the teachers are Catholic; approximately 91% are white, 2.5% black, 3.9% Hispanic, 1.0% Asian/Pacific Islander, .16% native American and 1.4% other.

EXHIBIT 22: Full-Time Equivalent Teaching Staff

† Includes Middle School teachers (1,298) counted separately beginning in 1995-96.

* Separate data for lay men and women is not available for the base year, 1987-88; this number reflects total lay teachers.

** Since 1991-92 totals include full-time and FTE part-time figures.

*** Since 1991-92 the data reflects the breakdown of brothers/priests into two distinct categories.

SPECIAL SERVICES TO STUDENTS

EXTENDED DAY PROGRAMS

The 1997-98 data collection of Catholic elementary and middle schools revealed that of all schools reporting this information 3,986 had extended day programs involving before and/or after school activities. This represents 57% of elementary schools. See Appendix C for a summary report by region and state.

Total	3,986

TITLE 1 SERVICES

NCEA data collection on the number of students receiving remedial instruction through Title I of the Improving America's Schools Act (IASA) are presented in Exhibit 27. The totals are lower than actual because several of the dioceses with large numbers of participating students have not supplied these data. A listing by region and state is found in Appendix C.

West/Far West	31,522
Total	131,405

FEDERAL NUTRITION PROGRAMS

The 1997-98 data collection reveals that many schools participate in the federal nutrition programs that provide free or reduced price breakfast and/or lunch to students whose family income level meets established criteria. The number of students receiving such services are indicated in Exhibit 27. The totals are lower than actual because several of the dioceses with large numbers of participating students have not supplied these data.

EXHIBIT 28

West/Far West	13,919	24,320
Total	40,966	157,278

GOVERNMENT SUBSIDIZED/ FREE TRANSPORTATION TO SCHOOL

Many dioceses reported that students were provided free or subsidized transportation services to/from school by local or state governments. The number of students reported receiving such services is indicated in Exhibit 29. The number of students receiving such services are indicated in Exhibit 27. The totals are lower than actual because several of the dioceses with large numbers of participating students have not supplied these data.

SCHOOLS WITH INTERNET ACCESS

For the first time in the NCEA data gathering survey, dioceses were asked to report on the number of schools which provide students with access to the Internet. The number of schools which make this technology available to students is listed in Exhibit 30. Not all dioceses reported these data.
